

Inclusion Criteria for Global Competency Certificate-Eligible International and Intercultural Experiences

To meet the non-academic graduating requirement of the GCC, a student must demonstrate that they have successfully taken part in a structured and supervised GCC-eligible international or intercultural experience. This experience must occur while the student is working toward the completion of the GCC.

There are two kinds of GCC-eligible international and intercultural experiences available to students:

Pre-Approved International and Intercultural Experiences
These experiences have already been approved by the GCC Faculty Advisory Committee, who will maintain a list of such experiences. Students who take part in these experiences must arrange for the submission of the following to the GCC Coordinator or Program Developer.
A letter from the individual or organization supervising the experience which indicates the student's successful participation in that experience.

International and Intercultural Experiences Requiring Approval			
These experiences must be approved by the GCC Faculty Advisory Committee before they can be used by the student to fulfill the non-academic graduating requirement of the GCC. Students who take part in these experiences must provide evidence of their time commitment and arrange for the submission of the following to the GCC Coordinator or Program Developer.			
<i>Option A</i>		<i>Option B</i>	
<i>Time Commitment</i>	<i>Required Documents</i>	<i>Time Commitment</i>	<i>Required Documents</i>
The experience is a minimum of 2 weeks or 80 hours in duration. The learning outcomes of the experience must address at least 3 of the GCC global competencies as defined in the GCC catalogue description and listed in the Appendix to this document.	A letter from the individual or organization supervising the experience which indicates the student's successful participation in that experience.	The experience is a minimum of 1 week or 40 hours in duration. The learning outcomes of the experience must address at least 3 of the GCC global competencies as defined in the GCC catalogue description and listed in the Appendix to this document.	A letter from the individual or organization supervising the experience which indicates the student's successful participation in that experience.
			An analysis/reflection assignment and/or portfolio that demonstrates critical thinking and global self-

			awareness within the context of the experience. Examples include a logbook or diary, reflective journal, and end-of-experience reflection.

Appendix: GCC Global Competencies

Global Competencies (2 of 7 required)	
Upon completion of the Global Competency Certificate, students will understand	
Competency	Definition
Worldviews of others	Globally competent individuals demonstrate an understanding of the complexity of elements important to members of another culture in relation to that culture’s history, values, politics, communication styles, economy, beliefs, and practices. ¹
Sustainable and inclusive economies	Globally competent individuals demonstrate an understanding of sustainable and inclusive economic engagement with human and natural systems, and the concept of ecological interdependence. ²
Global systems, contexts, and issues	Globally competent individuals analyze major elements of global systems and issues, including their historic and contemporary interconnections, as well as the differential effects of human organizations and actions. They then use their analysis to propose solutions to complex problems in the human and natural worlds. ²
Intercultural communication	Globally competent individuals possess the complex skills and abilities that one requires in order to interact effectively and appropriately when dealing with members of another culture, including patience, humility, empathy, tolerance for ambiguity, and target-language understanding. ³

Perspective-taking	Globally competent individuals possess the ability to process, weigh, and synthesize a range of cultural, disciplinary, ethical, and emotional interests to inform decision-making regarding natural and human systems. As a consequence, they attach significant importance to intercultural empathy and personal reflexivity.
Critical thinking	Globally competent individuals possess the ability to think systematically through problematic situations regarding what to believe or how to act. Critical thinking often requires collecting background information, weighing evidence, suspending judgement, and using criteria to evaluate options in order to reach a reasoned decision. ⁴
Global self-awareness	Globally competent individuals possess the ability to objectively evaluate the global impact of one's own and others' specific local actions on integrated social and ecological systems.
