

Unique Volunteer Opportunity in a Stroke Recovery Program at Surrey City Centre Library!

Columbia Speech and Language Services, Inc. is looking for volunteers to assist in our group* for people with Aphasia (an impairment in the ability to communicate that most commonly results from stroke). Because significant training is involved, we are ideally looking for people who can make a six month commitment. Details are:

- **Mondays, 12:30-3:30 pm**, excluding stat holidays and a two month break over the summer.
- Assist the speech-language pathologist with various duties including set up of the room, helping clients navigate from the drop off area to the correct room, various other duties as assigned and, most importantly, **supporting the clients in engaging in conversation** despite their aphasia
- This is **an ideal fit for TR students**, as conversation naturally arises during just the sort of recreational activity that you are so good at facilitating!

If this interests you, please contact Wendy Duke at wendy@columbiaspeech.com for more information.

*This program is possible due to the generous financial support of the Fraser Health Authority Acquired Brain Injury Program and the Stroke Recovery Association of BC/March of Dimes Canada.
