

I work as an Administrative Officer I for Humanities & Social Sciences, but my first experiences at Douglas College were as a student in 2014, where I took a wide range of courses that eventually culminated in a Bachelor of Applied Psychology. As a student, I worked as a Peer Tutor for the Learning Centre and as an Office Assistant for the Douglas Students' Union.

Since graduating, I returned to Douglas College as a full-time employee in 2020. I initially worked as an Administrative Associate for Science & Technology and then Humanities & Social Sciences before moving into my current position as an AO1.

I love how Douglas College prioritizes articulation of programs and courses with other post-secondary institutions while also offering unique courses and programs. I am particularly passionate about Douglas College's Bachelor programs, which allow students – like myself – to complete their studies at Douglas and offer applied, hands-on experiences for students.

As support staff and a former student, I have gained valuable knowledge and experience about Douglas College and its educational policies, programs, and curriculum. I've attended Faculty Education Committee (FEC) meetings, which gave me an understanding of how courses and programs are developed and revised. I am excited about the opportunity to serve as a support staff representative for the Education Council. If elected, I would bring my experience and insight to the Education Council.
