

Education Council Platform Statement

I'm a proud Douglas College alumni and I've been part of the DC community since September 2024.

As a student, I had the opportunity to serve on the Education Council in 2023-2024, as the student- New Westminster Representative. That experience allowed me to share the perspective of my peers and helped me develop a deeper understanding of the college's governance structure, the roles of various stakeholders, and the decision-making process of program curriculum and admissions. It reinforced the importance of collaborating and thoughtful governance of the college.

Now, working as a student Recruiter Advisor in the future students Office, I support prospective students as they consider beginning their post-secondary journey at Douglas. In this role, I've gained insight into the barriers and common challenges future students face when navigating admission requirements and program pathways. I hope to bring this perspective into Education Council to help strengthen their experience at Douglas

I'm also interested in expanding my involvement by contributing to education council and specifically the admissions advisory committee, as its work aligns with the support I provide to students. If elected, I will work diligently and collaboratively with the council to ensure students' needs continue to guide our decisions.

Thank you for your time and consideration.
