

Candidate Platform Statement

Education Council Representative

As a second-year Accounting student, I understand firsthand what students need from the institutions they invest in — clarity, fairness, and a Council that genuinely listens. I am running for Education Council Representative to ensure that student voices are not just heard, but acted upon.

Strategic Priorities

Academic & Financial Clarity

I will advocate for transparent academic policies and streamlined administrative processes that respect students' time and financial commitments — because unnecessary barriers cost more than just money.

Curriculum That Works for Students

I will push for program structures that reflect real industry demands, ensuring that the credentials we earn open the doors we are working toward — particularly in business, finance, and professional fields.

Inclusive and Supportive Standards

I will champion policies that recognize the full picture of student life, integrating mental health supports and accessibility considerations into academic policy so that no student is set up to fail.

As someone navigating the demands of a rigorous program while balancing real-world responsibilities, I bring a grounded, practical perspective to governance. The Education Council should reflect the students it serves — and I am committed to making sure it does.
