

A. Division: Instructional Effective Date: January 2009

B. Department / Commerce & Business Admin. Revision New Course
 Program Area: Business Management
 If Revision, Section(s) H
 Revised:
 Date of Previous Revision: October 2004
 Date of Current Revision: August 2008

C: BUSN 2429 **D:** BUSINESS STATISTICS **E:** 3
 Subject & Course No. Descriptive Title Semester Credits

F: Calendar Description:

 This course will provide students with an introduction to statistics. Students will learn to solve problems using computer spreadsheets. Topics include measures of central tendency and dispersion, probability, sampling, normal and binomial distributions, confidence intervals and hypothesis testing and regression analysis. Students will not receive credit for BUSN 2429 and BUSN 430.

G: Allocation of Contact Hours to Type of Instruction / Learning Settings

 Primary Methods of Instructional Delivery and/or Learning Settings:

 Lecture and Seminar

 Number of Contact Hours: (per week / semester for each descriptor)

 Lecture: 3 Hours
 Seminar: 1 Hour
 Total: 4 Hours

 Number of Weeks per Semester:

 15 Weeks X 4 Hours Per Week = 60 Hours

H: Course Prerequisites:

 CISY 1110 and (BUSN 1330 or FINC 1231 or MATH 12 or SURVEY MATH 12 or MATH 1115)

I: Course Corequisites:

 Nil

J: Course for which this Course is a Prerequisite

 BUSN 3431 and MARK 4483

K: Maximum Class Size:

 35

L: PLEASE INDICATE:
 Non-Credit
 College Credit Non-Transfer
 College Credit Transfer Requested: Granted:
 SEE BC TRANSFER GUIDE FOR TRANSFER DETAILS (www.bctransferguide.ca)

M: Course Objectives / Learning Outcomes

At the end of the course, the successful student should be able to:

1. collect statistical data using appropriate sampling techniques;
2. organize statistical data and calculate measures of central tendency and variation;
3. calculate the probability of events when they are mutually exclusive, independent and dependent;
4. use binomial and normal distribution to make probability estimates;
5. set up confidence intervals for population means and proportions;
6. use sample information to test statements or claims about parameters;
7. use computer spreadsheets to solve statistical problems;
8. use simple regression to determine significance of relationship between two variables.

N: Course Content:

1. Descriptive Statistics: frequency distributions, graphical displays, measures of central tendency, measures of dispersion.
2. Probability: experiments, counting rules, assigning probabilities, events, complement, exclusion, intersection, union, addition law, conditional probability.
3. Discrete Probability Distributions: expected value and variance, binomial distribution.
4. Continuous Probability Distributions: uniform and normal probability distributions.
5. Sampling Distributions: random sampling, sampling distribution of sample mean and sample proportion.
6. Interval Estimation: means and proportions, small and large samples, determining sample size.
7. Hypothesis Testing: formulating and testing a research hypothesis, 1 and 2 tailed tests about sample mean and proportion, Type 1 and 2 error.
8. Statistical Inference with Two Populations (independent samples): interval estimation and hypothesis tests for difference between two means and between two proportions.
9. Computer Analysis with Excel Spreadsheets: creation of spreadsheets, histograms, frequency tables, scatter charts, interval estimates, and use of probability distribution functions.
10. Simple Linear Regression: least squares, model and assumption, R-Squared, prediction.

O: Methods of Instruction

Lectures and seminars.

P: Textbooks and Materials to be Purchased by Students

Anderson, D.R., Sweeney et al. Statistics for Business and Economics, Latest Ed. South-Western (Thomson).

Business Calculator: one of:

- Texas Instruments BAI+
- Texas Instruments BA35
- Hewlett Packard 10B
- Sharp EL-733a

Q: Means of Assessment	
Final Exam	30%
Term Examinations (2-3)	40% - 50%
Computer Lab Test	5% - 10%
Assignments (6-12)	15% - 25%
Participation	<u>0% - 5%</u>
	100%
R: Prior Learning Assessment and Recognition: specify whether course is open for PLAR	
No.
