M:	Course Objectives / Learning Outcomes			
	Upon succes	Upon successful completion of this course, the student will be able to:		
	1.	Describe the dynamic attributes of community.		
		Articulates the connections between community and quality of life		
		 Compares and contrasts asset-based and service-based models of community development 		
		Compares and contrasts the benefits and drawbacks of community experience for people who live		
		within a service system and those who do not		
	2.	Articulate the value and importance of friendships and family in the lives of people who live with a		
		disability.		
		Identifies circles of support in personal life		
		• Describes the strengths which families bring to the support of their children who live with		
		disabilities		
		Considers the dynamics which underpin friendship		
	3.	Plan, develop and evaluate effective strategies for building community presence and contribution.		
		 Articulates the importance of knowing and understanding the person who is being supported 		
		 Creates personal profiles which reflect thoughtful observation and inquiry 		
		Demonstrates strategies used to link individuals with community		
		 Recognizes opportunities for and barriers to friendship and family involvement 		
		Recognizes potential areas of competing values		
N:	Course Cont	ent: The following global ideas guide the design and delivery of this course:		
	1.	The hard work of community building begins by revisioning community as a place where all people		
		are valued and appreciated for their gifts.		
	2.	Increasingly, there is an interest in the field of disability support in an alternative way of viewing		
		community and community support. The new vision is capacity focused, concentrating on the assets of		
		community rather than its lists of needs. It is believed that practitioners benefit from a critical		
		understanding of community development which focuses on building from the strength and capacity		
		of individuals, families and neighborhoods. This knowledge provides students with a deeper		
		understanding of community and gives them new tools to facilitate inclusion and identify opportunities		
		for real contribution.		
	3.	The social isolation of people with disabilities is a growing concern amongst advocates and		
		professionals. The professional world of disability support has moved people out of institutions but		
		now faces the next challenge of facilitating ordinary relationships and friendships within the		
		community. It appears that a next step might be to better understand some of the inherent structural		
		barriers which exist within our systems of care which might compromise the development of these		
		ordinary relationships and lead to isolation.		
0:	Methods of Instruction			
	•	Lecture		
	•	Group work		
	•	Student presentation		
	•	Guest speakers		
	•	Media presentation		
P:	Textbooks a	nd Materials to be Purchased by Students		
	T.B.A.			
Q:		ssessment: This course will conform to Douglas College policy regarding the number and weighting of		
	evaluations.			
	•	Community inventory		
	•	Major paper on facilitation strategies		
	•	Circle of support analysis		
	•	Classroom participation self assessment		
	•	Story telling		
R:		ng Assessment and Recognition.
